Ajit Pai

Dear Mr Pai,

I am not sure what to say to you sir that will have any impact at all upon your position regarding Net Neutrality.

I believe you are an intelligent man. I believe you can understand logic. I hope you are not an arrogant man. I ask the following questions and ask you to honestly answer them.

Do you believe free markets benefit our Republic?

Do you believe innovation benefits our Republic?

Do you believe in favoritism?

Do you believe in censorship?

If you answered, yes, to the first two questions and, no, to the last two questions then you must be true to yourself and keep Net Neutrality as it is. Allowing Internet Service Providers to select and promote their preferred services is inconsistent with the concept of a free market. This action will stifle innovation while promoting favoritism and censorship.

How can you be true to the ideals of our Republic when you are handicapping small business owners and the self-employed?

Please be the champion of the free market and do what is right for your children and mine and keep Net Neutrality as it is. Allow equal access to the internet to all citizens of this great Republic.

Please earn our trust by working for the citizens not the corporations.

Sincerely yours,

Peter A. Gillespie
